Pilot Course on "Deep Generative Models: A Statistical Perspective"

1) Program Developers (PDs): Younggeun Kim (younggeun91@unist.ac.kr); Jaejun Yoo (jaejun.yoo@unist.ac.kr)
2) Teaching Assistants: Jeongyun Ha (jagak2357@unist.ac.kr); Sangyeob Yeo (sosick377@unist.ac.kr); Gunha Hong (honggunha@unist.ac.kr)
3) Course Schedule: Class meetings will be held between 10:00 AM and 12:00 PM on the following dates in Room 108-319(E) (Lunch will be provided):

   04/24 (F), 05/08 (F), 05/29 (F), 06/12 (F), 06/19 (F), 07/03 (F), 07/24 (F), 07/31 (F)

4) Recording: The pilot lectures will be recorded (only the instructor and the lecture slides will be captured).
5) Group Presentation:
   - Group Presentation (to be held on 07/31): Students will select a tutorial related to generative models from top-tier AI conferences such as ICML and NeurIPS. Using these materials, a flipped-learning style group presentation will be conducted.

6) Detailed Schedule:

Week	Contents	Remark
01	**04/24 (F): Pilot Lecture 1:** Course Introduction + Fundamentals of Probability Theory + Random Variables	* Midterm Exam Period
02	-	
03	**05/08 (F): Pilot Lecture 2:** Statistical Estimation and Hypothesis Testing	* 05/05 (T): Children's Day
04	-	
05	-	
06	**05/29 (F): Pilot Lecture 3:** Basics of Probabilistic Modelling	
07	-	
08	**06/12 (F): Pilot Lecture 4:** Autoregressive Model + Energy-based Models	
09	**06/19 (F): Pilot Lecture 5:** Variational Autoencoders	* Final Exam Period
10	-	
11	**07/03 (F): Pilot Lecture 6:** Generative Adversarial Networks	
12	-	
13	-	
14	**07/24 (F): Pilot Lecture 7:** IPM-based Approaches + Wasserstein distance-based Approaches	
15	**07/31 (F): Pilot Lecture 8:** Score-based Approaches + Group Presentations	**Group Presentation**
